# New Hashima Spinner Speeder

*Design by Jordan Jivkov*

For the New Hashima collab, I wasn't able to participate and send any LEGO builds physically, so I wanted to create a design for something small that anyone could build and populate in their cubes to add life to the vibrant cyberpunk city. That's when I came up with the spinner speeder idea: a bike template that could be changed into whatever color was needed.

I packed the speeder with as much detail as I could in a small space, utilizing every stud and only 47 pieces (including the stand. One of my favorite parts of the build is using two 3679 turntable plates to create the iconic spinner front resembling a wheel.

Finally, remember to customize your minifigure to match your bike! I chose a minifigure parts with a cyberpunk vibe and goggles, imagining him to be speeding throughout the city to make a delivery in Sector 2, then stop in the Old City for a nefarious meeting, then back home for a sushi dinner.

This speeder bike was so much fun to design, and I hope you'll enjoy building this model to bring a little part of New Hashima home with you.
